THE CIVITAS INITIATIVE
IS CO-FUNDED BY
THE EUROPEAN UNION

This project has received funding from the European Union's Horizon Europe Research and Innovation programme under Grant Agreement No. 101069806.

Five pillars to **DECARBONISE** last **MILE** logistics

At the core of mobility transitions

Pollution, congestion... At a time when road transport represents 76% of all EU transport GHG emissions and global freight is expected to triple between 2015 and 2050, DECARBOMILE aims to accelerate the transition towards greener and smoother deliveries.

By bringing together municipalities, operators, digital innovators and logistics experts, the project provides a unique opportunity to develop and test innovative solutions, leading to concrete evaluations, policy recommendations and pathways for market uptake and replication.

*We're shaping the future
of sustainable deliveries!*

The full potential of green last mile logistics demonstrated across 5 pillars, 4 Living Labs and 4 Satellite Cities
