*Road-to-river
freight shift*

*Lower emissions &
congestion*

*Scalable multimodal
logistics solutions*

Hamburg is redefining urban freight

Low-Carbon • Multimodal • Future-Ready

This project has received funding from the European Union's Horizon Europe Research and Innovation programme under Grant Agreement No. 101069806.

HAMBURG

Multimodal logistics for a climate neutral city

USE CASE - URBAN WATERWAY TRANSPORT

Hamburg's use case will focus on using waterways and canals to deliver DHL parcels from the Billbrook district, a major industrial and commercial location in Hamburg, to the city centre.
